

CS 6393: Cyber Security Models and Systems
CS 4593: Cyber Security Models and Systems (cross-listed)

Project Guidelines 2

Ravi Sandhu

Spring 2019

- What is it? When?
- Why is it impactful? What is technically novel?
- Incident response, by an organization, by the community
- Technical mitigation: new or previously known
- Mitigation limits
- Lessons learned
- Anything else you consider significant
- List of references used:
 - Primary, Secondary, Recommended reading

- What is it? When? Maturity? Scope (important)
- Why is it impactful? What is technically novel?
- What is important from a security perspective? From whose viewpoint?
- What is novel from a security perspective
- Technical solutions: new or previously known
- Limits to how secure we can make this
- Future outlook
- Anything else you consider significant
- List of references used:
 - Primary, Secondary, Recommended reading
